Doctors Warn Hair Removal By X-Ray Can Cause Cancer

CHICAGO. — The Journal of the American Medical association has published an appeal to health authorities, chambers of commerce, better business bureaus and legislative committees of all civic organizations to warn the public against X-rays for removing superfluous hair.

These rays, says the warning, can lead to cancer, and if not, often to disfigurement worse than the hair.

In the '20s X-rays were used in varying amounts on women and girls for hair removal.

The article summarized the bad results, 20 years afterward. It declares that either one large dose of X-ray for this purpose, or numerous small doses, are dangerous.

The present appeal is made because, the article says, the hair-removing tactics of the '20s are being revived. The instruments used do not always indicate that X-rays are the hair removers.

Eloquent Missionary Is Given Jeep, Five Bikes as She Sails

BOSTON. —An eloquent 55-year-old missionary was on her way back to Africa with a jeep station wagon and five bicycles to help native pastors spread Christianity through the bush.

Miss Mary W. Hurlbut of Sedalia, Mo., procured the vehicles through the American Board of Foreign Missions, Boston, to speed up missionary service around Elende, West Africa — an area as large as New York state.

A Congregational Christian teacher there since 1924, she recently concluded a year's furlough.

Four Million in United States Suffer From Heart Ailments

PHILADELPHIA.—Of the 140 million in the United States, 4 million are suffering from some form of impaired heart action, according to Dr. Joseph VanderVeer, chief of the cardiovascular department of Pennsylvania hospital and assistant professor of clinical medicine at University of Pennsylvania School of Medicine.

Dr. VanderVeer said that in 1942 there were 400,000 deaths attributed to cardiovascular disease.

"Actually that was 28½ per cent of all the deaths that year," said Dr. VanderVeer. "But it must be considered that the population is greater too. In 1900 there were some 8,500,000 persons in this country between 50 and 75 years of age. In 1942 the number in this age group had risen to 24 million, and in 1980 it is estimated there will be 42 million people past 50.

"While figures reveal that heart disease is one of the greatest threats today, new techniques in diagnosis offer greater assurance for longer life by those suffering from cardiac ailments. Many deaths attributed to 'acute indigestion' several decades ago, undoubtedly were caused by heart disease."

Few Want Job of Guarding German Prisoners in Jail

BERLIN. — Jobs guarding Rudolf Hess and six other major Nazi war criminals confined in Berlin's Spandau prison are going begging, the American military government disclosed as it began advertising for the needed guards.

The Berlin daily bulletin, circulated to American occupation personnel, carried a notice offering "openings for positions as prison guards at Spandau." The gross pay is $3,619 a year. Required qualifications are at least three years' active service in the U. S. army, navy, coast guard or marine corps or three years service in a police or fire-fighting organization.

Spandau, situated in the British sector of Berlin, is administered by the four occupying powers.

Uncle Sam Says

What would you do if you learned that the worker next to you at the office or in the plant was taking home extra pay every payday and you could do the same? Your Uncle Sam needs only one guess. Well, the Payroll Savings Plan for Savings Bonds acually provides extra pay because it accumulates Saving Bonds for you which pay off at the rate of $4 for every $3 in 10 years. All you have to do is to authorize your employer to hold back a stipulated amount which he will hand back to you in a better form of money—money which earns interest —U. S. Savings Bonds. Saving Bonds are extra pay. For example if you take part of your pay in Savings Bonds at the rate of $3.75 per week, the Bonds become $7,162.45 in 10 years.
